

Hello,

I believe that the National Association of Broadcasters (NAB), with regard to their petition 04-160, have forgotten that democracy is about freedom of choice. I'm sure they're concerned about the long-term viability of local radio stations, but the United States is a capitalist economy, and competition for them - and for the satellite radio providers - is good for quality and innovation.

As an XM Radio subscriber, I respectfully request that you reject NAB petition 04-160, in the interest of the American consumer, who will benefit most from the added competition between radio formats.

Thank you for your time.

Sincerely,

- Chris Pollette
